DEPENDABLE

SEEDS — PLANTS — BULBS

For the MARKET and
HOME GARDENER

1938

BOFFERDING SEED CO.

Seedsman

652 Second Avenue North

Minneapolis, Minn.

SPECIALTIES IN VEGETABLE AND FLOWER SEEDS

MUSKMELON—No. 722. An outstanding new melon. The size is medium with a faint stripe and heavy netting, matures about the same time as Hales Best. The flesh is thick, deep colored with a very small seed cavity. Flavor is exceptional.

WATERMELON—Improved Kleckley Sweet No. 6. Wilt Resistant. Matures the same time as the regular strains of Kleckley, but has the advantage of being almost fully resistant to fusarium wilt. Dark green, good length with rich red flesh. White seeds.

CABBAGE—Golden Acre, Yellows Resistant. The earliest round headed yellows resistant variety. Very uniform solid round heads growing true to type.

BROCCOLI—Calabrese or Italian Sprouting. Leading variety for both market and home gardens. Plants form a central head of bluish green flower buds resembling a loose head of cauliflower. After the main head is cut side branches develop and form heads which with the stems are cut and served in the same way as Asparagus.

LETTUCE—New York No. 515. An early variety adapted to summer and early fall planting. Resistant to tip burn. Heads medium large, compact and dark green.

SPINACH—Summer Savoy Special. Resembles Long Standing Bloomsdale except that it is darker green and a trifle more curled, but has the advantage of being a more suitable spinach for summer use.

TOMATO—Rutgers. A second early variety. Plant large with thick stems, vigorous foliage and fruits similar to Marglobe, but flatter at stem end. Smooth bright red flesh with thick walls and small seed cells; ripens from the center and has flesh of low acidity.

CUCUMBER—Colorado. Highly resistant to unfavorable growing conditions, long slender cucumber of excellent shape and intense dark green coloring which is maintained longer than in any other variety.

CAULIFLOWER—White Mountain. Short stem. Heads are of fine texture with white curd of great depth. We recommend this variety as one of the finest of the cauliflower varieties.

Again this season Marigold are very popular with Gigantea, Sunset Giants topping the list of newer varieties, Harmony, Guinea Gold, Yellow Supreme and the dwarf Tagates, Gnome all are excellent and should be in every garden.

The Zinnia family has a new comer this year Zinnia, Linearis. Charming single orange blossoms with a lighter yellow stripe through the center of each petal cover dwarf plants desirable for borders and bedding. And do not forget the Fantasy both in a mixture of colors and the yellow Star Dust, Lilliput in the Pastel Shades and the Dahlia Flowered Zinnias.

The Sensation Cosmos are gaining in popularity and Dahlias grown from seed prove a fascinating garden pastime. For those who like cut flowers try the striking combination of Hunnemannia and Double Blue Bachelor Buttons. And for those who like to grow a few of every variety we suggest our **Suprise Mixture** which contains some of every annual variety we have.

TULIPS—Dutch and Domestic Bulbs for fall planting. We import the finest. Ask for price list about September 1st.

DAHLIAS—And Bulbs for spring planting. Write for price list.

Bofferding Seed Co. gives no warranty, express or implied, as to description, purity, productiveness or any other matter of any seeds, plants or bulbs we send out, and we will not be in any way responsible for the crop.

TERMS—We deliver orders over \$10.00 provided at least half of the order is for small seed (other than Peas, Beans and Corn). No charge for bags and other containers.

All prices subject to change and unsold and all orders subject to approval and acceptance by the Bofferding Seed Co., at Minneapolis, Minn.

Let us quote our special prices for large quantities.

GENERAL LIST

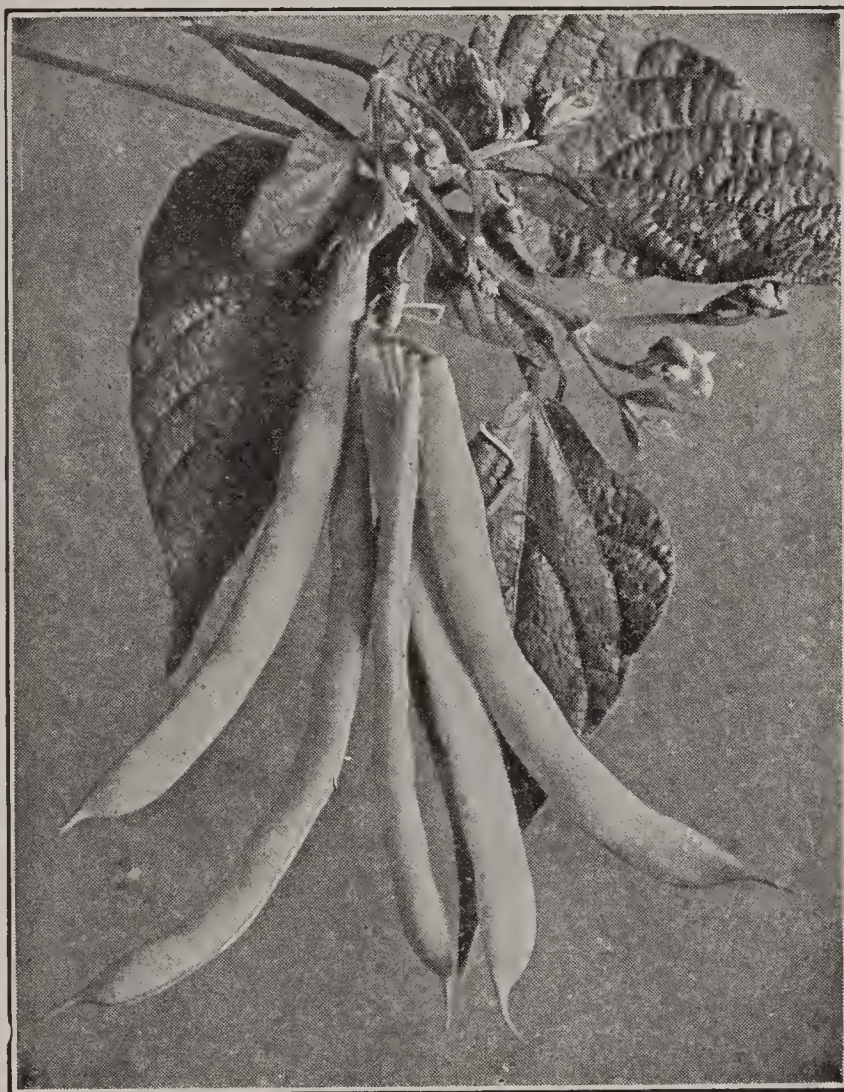

Bofferding's Vegetable Seeds

Our list comprises only the tried and best varieties and our stocks are secured from the most reliable sources; every lot of seed tested for germination.

Packets, ounces and quarter pounds, post paid at prices listed.

Mammoth Long Red, Improved. Roots large, slightly tapering. Red outside, flesh white tinged rose.....	.20	.50

BROCCOLI—

Italian Green Sprouting, Calabrese. Cultivated like cabbage, it bears a succession of sprouting heads which if kept cut, will be replaced by others. Each sprout ends in a head of deep green buds. One of the most delicious green vegetables.....Pkt. 5c	.30	1.00 3.75
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----	-----------

BRUSSELS SPROUTS—

Long Island Improved. Cultivated like late cabbage. The small "cabbages" cluster around main stem. Mature in autumnPkt. 5c	.25	.85
-----------------------------------------------------------------------------------------------------------------------------------------	-----	-----------

Hollander, Ferry Type—Our Own Grown Stock

CABBAGE, Early and Second Early Varieties—1 oz. about 2,000 plants. $\frac{1}{4}$ to $\frac{1}{2}$ lb. per acre

Packet 5c

	Oz.	$\frac{1}{4}$ Lb.	Lb.
Golden Acre. The earliest round headed cabbage. Similar to Copenhagen Market, but earlier. Heads solid, hard, of medium size.....	.25	.85	3.00
Golden Acre, Selected Strain. Seed selected from the very finest heads. Best seed obtainable.....	.50	1.75	6.00
Copenhagen Market. Our very early strain. Short stem, heads large, round and solid. Excellent quality...	.25	.85	3.00
Copenhagen Market. Our late strain. Especially good for kraut cabbage35	1.00	3.50
Glory of Enkhuizen. Second early variety. Short stemmed, solid heads of excellent quality.....	.25	.75	2.50
All Seasons. Popular kraut cabbage.....	.25	.75	2.50
Earliest Round Red. Earliest red cabbage.....	.35	1.25	4.00

CABBAGE, Late Varieties—

Hollander, Ferry Type, Our Own Grown. Our recommendation as the very best late cabbage. Medium stem, round solid heads of the finest quality. Good shipper and for storing30	.90	3.00
Hollander, Ferry's Own Grown.....	.50	1.50	5.00
Danish Ballhead. Short stemmed. Heads large, flattened globe-shape25	.75	2.50
Penn State Ballhead. Extremely heavy yielder.....	.35	1.25	4.00
Danish Stonehead. Late red cabbage.....	.30	1.00
Mammoth Rock Red. Largest and best red cabbage.....	.30	1.00
Savoy, Improved American. Leaves curled. Heads globe-shaped, slightly flattened.....	.30	1.00

CABBAGE—Yellows Resistant Strains—

Golden Acre, Yellows Resistant. Earliest round headed yellows resistant variety.....	.50	1.50	5.50
Marion Market. Round, hard heads like Copenhagen.....	.40	1.25	4.50
Globe. Improved. Resistant strain of Glory of Enkhuizen40	1.40	5.00
Wisconsin Hollander No. 8. Excellent for winter storage	.35	1.10	4.00

CAULIFLOWER—

1 oz. to 3,000 plants.

White Mountain. Where other first quality strains have failed, White Mountain, because of its unusual qualities and resistance to adverse weather conditions

has produced nearly perfect crops. The heads are of fine texture with pure white curd of great depth. Short stem. Foliage is medium sized, but fully protects the head

Early Snowball. Best early variety. Dependable header.

Heads firm, medium, solid and pure white.....

Super-Snowball. Desirable main crop variety, also used for early planting as plants start heading early.

Heads medium large, compact and white.....

Snowdrift. Head slightly larger than Snowball, firm, solid, white, well protected with leaves.....

Danish Giant or Dryweather. Later than Early Snowball and of larger growth. Heads creamy white.

Adapted to dry weather conditions.....

Purple Bronzino. Heads tinged purple.....

RADISH—

Super Select, Early Scarlet Globe

1 oz. to 100 feet of row. 8 to 10 lbs. per acre.

Packet 5c

Early Scarlet Globe. We have exceptionally fine stocks of this superb variety. It is one of the very earliest of the forcing radishes and does very well outside. Roots are of fair size, globe-shaped and with a small top. Always crisp and tender; color bright scarlet. Samples are drawn from every bag, sown in greenhouses and proven for variety and germination.

LAWN GRASS SEED

HOW TO MAKE A LAWN

Preparation of Soil—A fine seed bed is essential and the soil should be spaded deeply removing large lumps. Roll to make the area even.

Fertilizing—Use a reliable commercial fertilizer and mix thoroughly with the soil for quantity follow the directions on the container. Wet soil and leave for about two days. Never sow seed immediately after applying a fertilizer as the seedlings will burn.

Seeding—Use a good mixture of lawn grass seed. Seed may be sown any time, preferably in the spring. Choose a quiet day and sow the seed half one way and half the other way to insure a more even stand. Sow one pound of seed to every 250 - 300 square feet, then roll again. Wet thoroughly in the evenings until the sod is well established.

Bofferding's Super Select Mixture. We feel no other factor is more important than the quality of the grass seed and we pride ourselves on the excellent quality of our own lawn grass seed mixtures. Only the heaviest recleaned seed is used. This mixture will give you a rich, smooth, velvety sod. Price: lb. 30c; 5 lbs. \$1.40; 25 lbs. \$6.25; 100 lbs. \$23.00.

Bofferding's Shady Place Mixture. Our special mixture of hardy, quick growing grasses best suited for the shady places in your lawn. The regular feeding and watering of areas shaded by trees is of utmost importance. Price: lb. 40c; 5 lbs. \$1.90; 25 lbs. \$8.50.

MEEKER SMOOTHING HARROW

Write for Catalog and Prices

Meeker Harrow—Has become a great favorite among all types of gardeners and farmers. It has two sets of rollers containing 58 disks. These grind all lumps and clods into a fine, powdery soil, and with the smoothing board makes a field into a better seed bed than any other harrow known. Regular size, 6 ft. 8 in. by 6 ft.

VIRGINIA - CAROLINA CHEMICAL CORPORATION FERTILIZERS

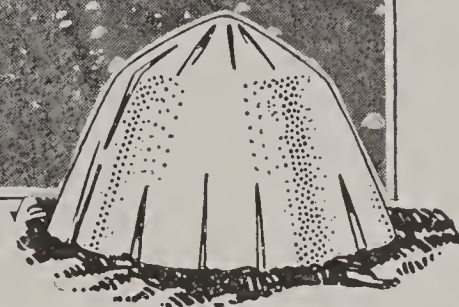

Early Markets Pay High For Crisp, Tender Vegetables

Earliness, quality and yield determine the profits in market gardening. You can put crispness and delicate flavor in your vegetables — get them on the market earlier — produce larger yields by the use of V-C Vegetable Fertilizers.

V-C Vegetable Fertilizers are the result of years of scientific research and farming practice. They are used by many of the most successful market gardeners.

BOFFERDING SEED COMPANY

R - C DUST

We believe R - C NON-POISONOUS DUST is the BEST ON THE MARKET

AMERICAN BEAUTY DUSTER

Carried and operated by one man. The Duster is equipped with shoulder straps and backrest heavily padded, insuring the maximum of comfort. The bellows is operated by the right hand, and delivers the largest cloud of any one man duster. The spreader, when attached to the end, deflects the dust upward. In this way the lower sides of leaves on low growing plants are easily reached without stooping. By means of the rubber hose and tubing it is possible to dust trees up to twenty-five feet. The bellows places the cloud under constant control where you want it and when you want it. No material is wasted.

AMERICAN BEAUTY DUSTER

Price—\$22.00

Net Weight—15 pounds

Shipping Weight—18 pounds

R - C DUST has proven most efficient in the control of Mexican Bean Beetles on beans; Cabbage Worms; Loopers; and Aphis on plants in the cabbage, kale and cauliflower variety; Horn Worm on tomatoes; Potato Beetles; Cucumber Beetles and Red Spiders on cucumbers; Thrip on onions and gladioli.

R - C DUST is also recommended in combating Leaf Tyers, Celery Worms, Chrysanthemum Midge, Caterpillars, White Flies, Leaf Hoppers and many other insects.

DIRECTIONS—Dust thoroughly, covering all surfaces with a light layer of R - C DUST. Be sure and cover new growth. Dust after watering or when dew is on plants in the early morning or late afternoon. Re-apply after rains.

ANTS—Shake a little dust into the ant hills and along the walks.

PRICES	{	1 lb. — \$.25	10 lbs. — 1.75	100 lbs. — 12.50
		5 lbs. — .90	25 lbs. — 3.50	

R - S WET SPRAY may be used where a wet spray is desired and is also more effective in killing Woolly Aphis as the dust does not penetrate the waxy covering on this Aphis. Write for prices.

No Poisonous Residues — No Arsenic — No Lead — No Flourine.
